

# Creating, Configuring, and Accessing Environments

---

**Vitthal Srinivasan**

CO-FOUNDER, LOONYCORN

[www.loonycorn.com](http://www.loonycorn.com)

# Overview

**Creating a Directed Acyclic Graph (DAG)**

**Configuring trigger rules**

**BashOperator**

**PythonOperator**

**BranchPythonOperator**

**DummyOperator**

# Demo

**Use all\_success trigger**

The Composer web server  
UI needs to be refreshed to  
get the latest status, it does  
not auto-update

Keep the DAGs folder of the  
environment tidy to prevent  
inadvertent execution

# Demo

**Use one\_failed trigger**

# Demo

**Use all\_done trigger**

Demo

**Specify Python dependencies**

Demo

**Create dummy operator**

# Demo

**Use BranchPythonOperator for  
branching**

# Summary

**Creating DAGs**

**Configuring trigger rules**

**BashOperator**

**PythonOperator**

**BranchPythonOperator**

**DummyOperator**
