

Managing and Monitoring Workflows

Vitthal Srinivasan

CO-FOUNDER, LOONYCORN

www.loonycorn.com

Overview

Setting Airflow and environment variables

Copying files with GCS operators

Sending emails with SendGrid

SQL queries and CRUD operations with BigQuery

Dataproc Hadoop operators

Demo

Use Airflow variables

Copy files from one GCS bucket to another

Demo

**Delete DAGs and Composer
environment**

Demo

**Use SendGrid email integration in
Airflow**

Demo

**Complex pipeline integrating BQ, GCS,
and SendGrid email notifications**

Demo

**Use Dataproc Hadoop operators in
Composer**

Summary

Setting Airflow and environment variables

Copying files with GCS operators

Sending emails with SendGrid

SQL queries and CRUD operations with BigQuery

Dataproc Hadoop operators

Delete Resources

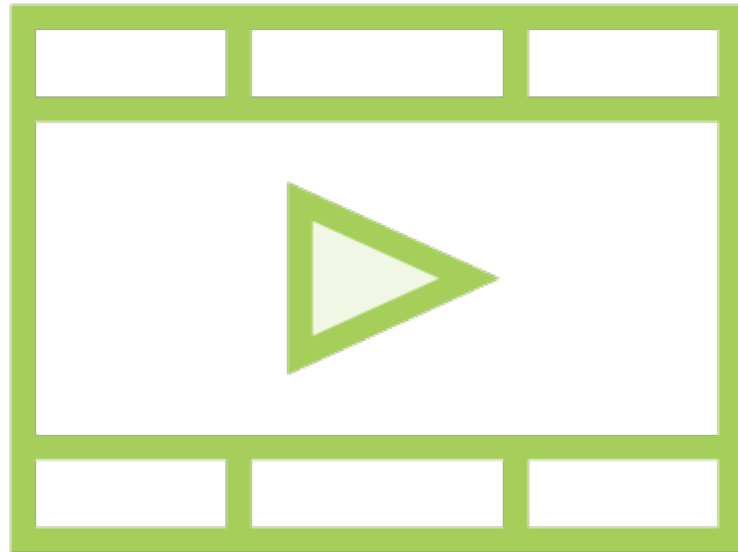

Airflow environments

VM instances

Cloud Storage buckets
